## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 12-16 are pending.

Claims 12-16 are rejected.

### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 12, 2002 has been entered.

### ***Priority***

3. Acknowledgment is made of applicant's claim for domestic priority under 35 U.S.C. 121 for US Application No. 09/581,843, filed on June 19, 2000, now US Patent No. 6,284,917.
4. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/581,843, filed on June 19, 2000. ***Specification***

5. The abstract of the disclosure is objected to because it exceeds 150 words. Correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Keisuke et al. (JP 06-306252) or Keisuke et al. (JP 07-011074) or Keisuke et al. (JP 07-173342).

Each of the above references disclose compounds according to claims 12 and 13, the method of increasing plasticity as disclosed in claim 14, and the plastic product according to claim 15 (see entire disclosures).

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keisuke et al. (JP 06-306252) or Keisuke et al. (JP 07-011074) or Keisuke et al. (JP 07-173342).

The instant invention differs from the above prior art references in that the prior art does not specifically disclose the use of PVB as the plastic product. However, since it is a polyolefinic resin its use is at least suggested by Keisuke et al. (JP '252) and Keisuke et al. (JP '074) and Keisuke et al. (JP '342).

#### ***Response to Arguments***

12. Applicant's arguments filed September 12, 2002 have been fully considered but they are not persuasive. The applicants argue that claims 12 and 13 are directed to mixtures. The examiner disagrees. Claims 12 and 13 are directed to a dicarboxylic acid diester selected from a specific group of disclosed diesters. These are product claims. If the applicants intended to claim a specific mixture comprising a dicarboxylic

Art Unit: 1621

acid diester selected from the specific group of diesters disclosed in claims 12 and 13, then the claims need to be amended to reflect applicants' intention.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rosalynd Keys whose telephone number is 703-308-4633. The examiner can normally be reached on M and F 3:00-8:00 pm and T-R 5:30-10:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 703-308-4532. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
